video tours

...learning together for life...

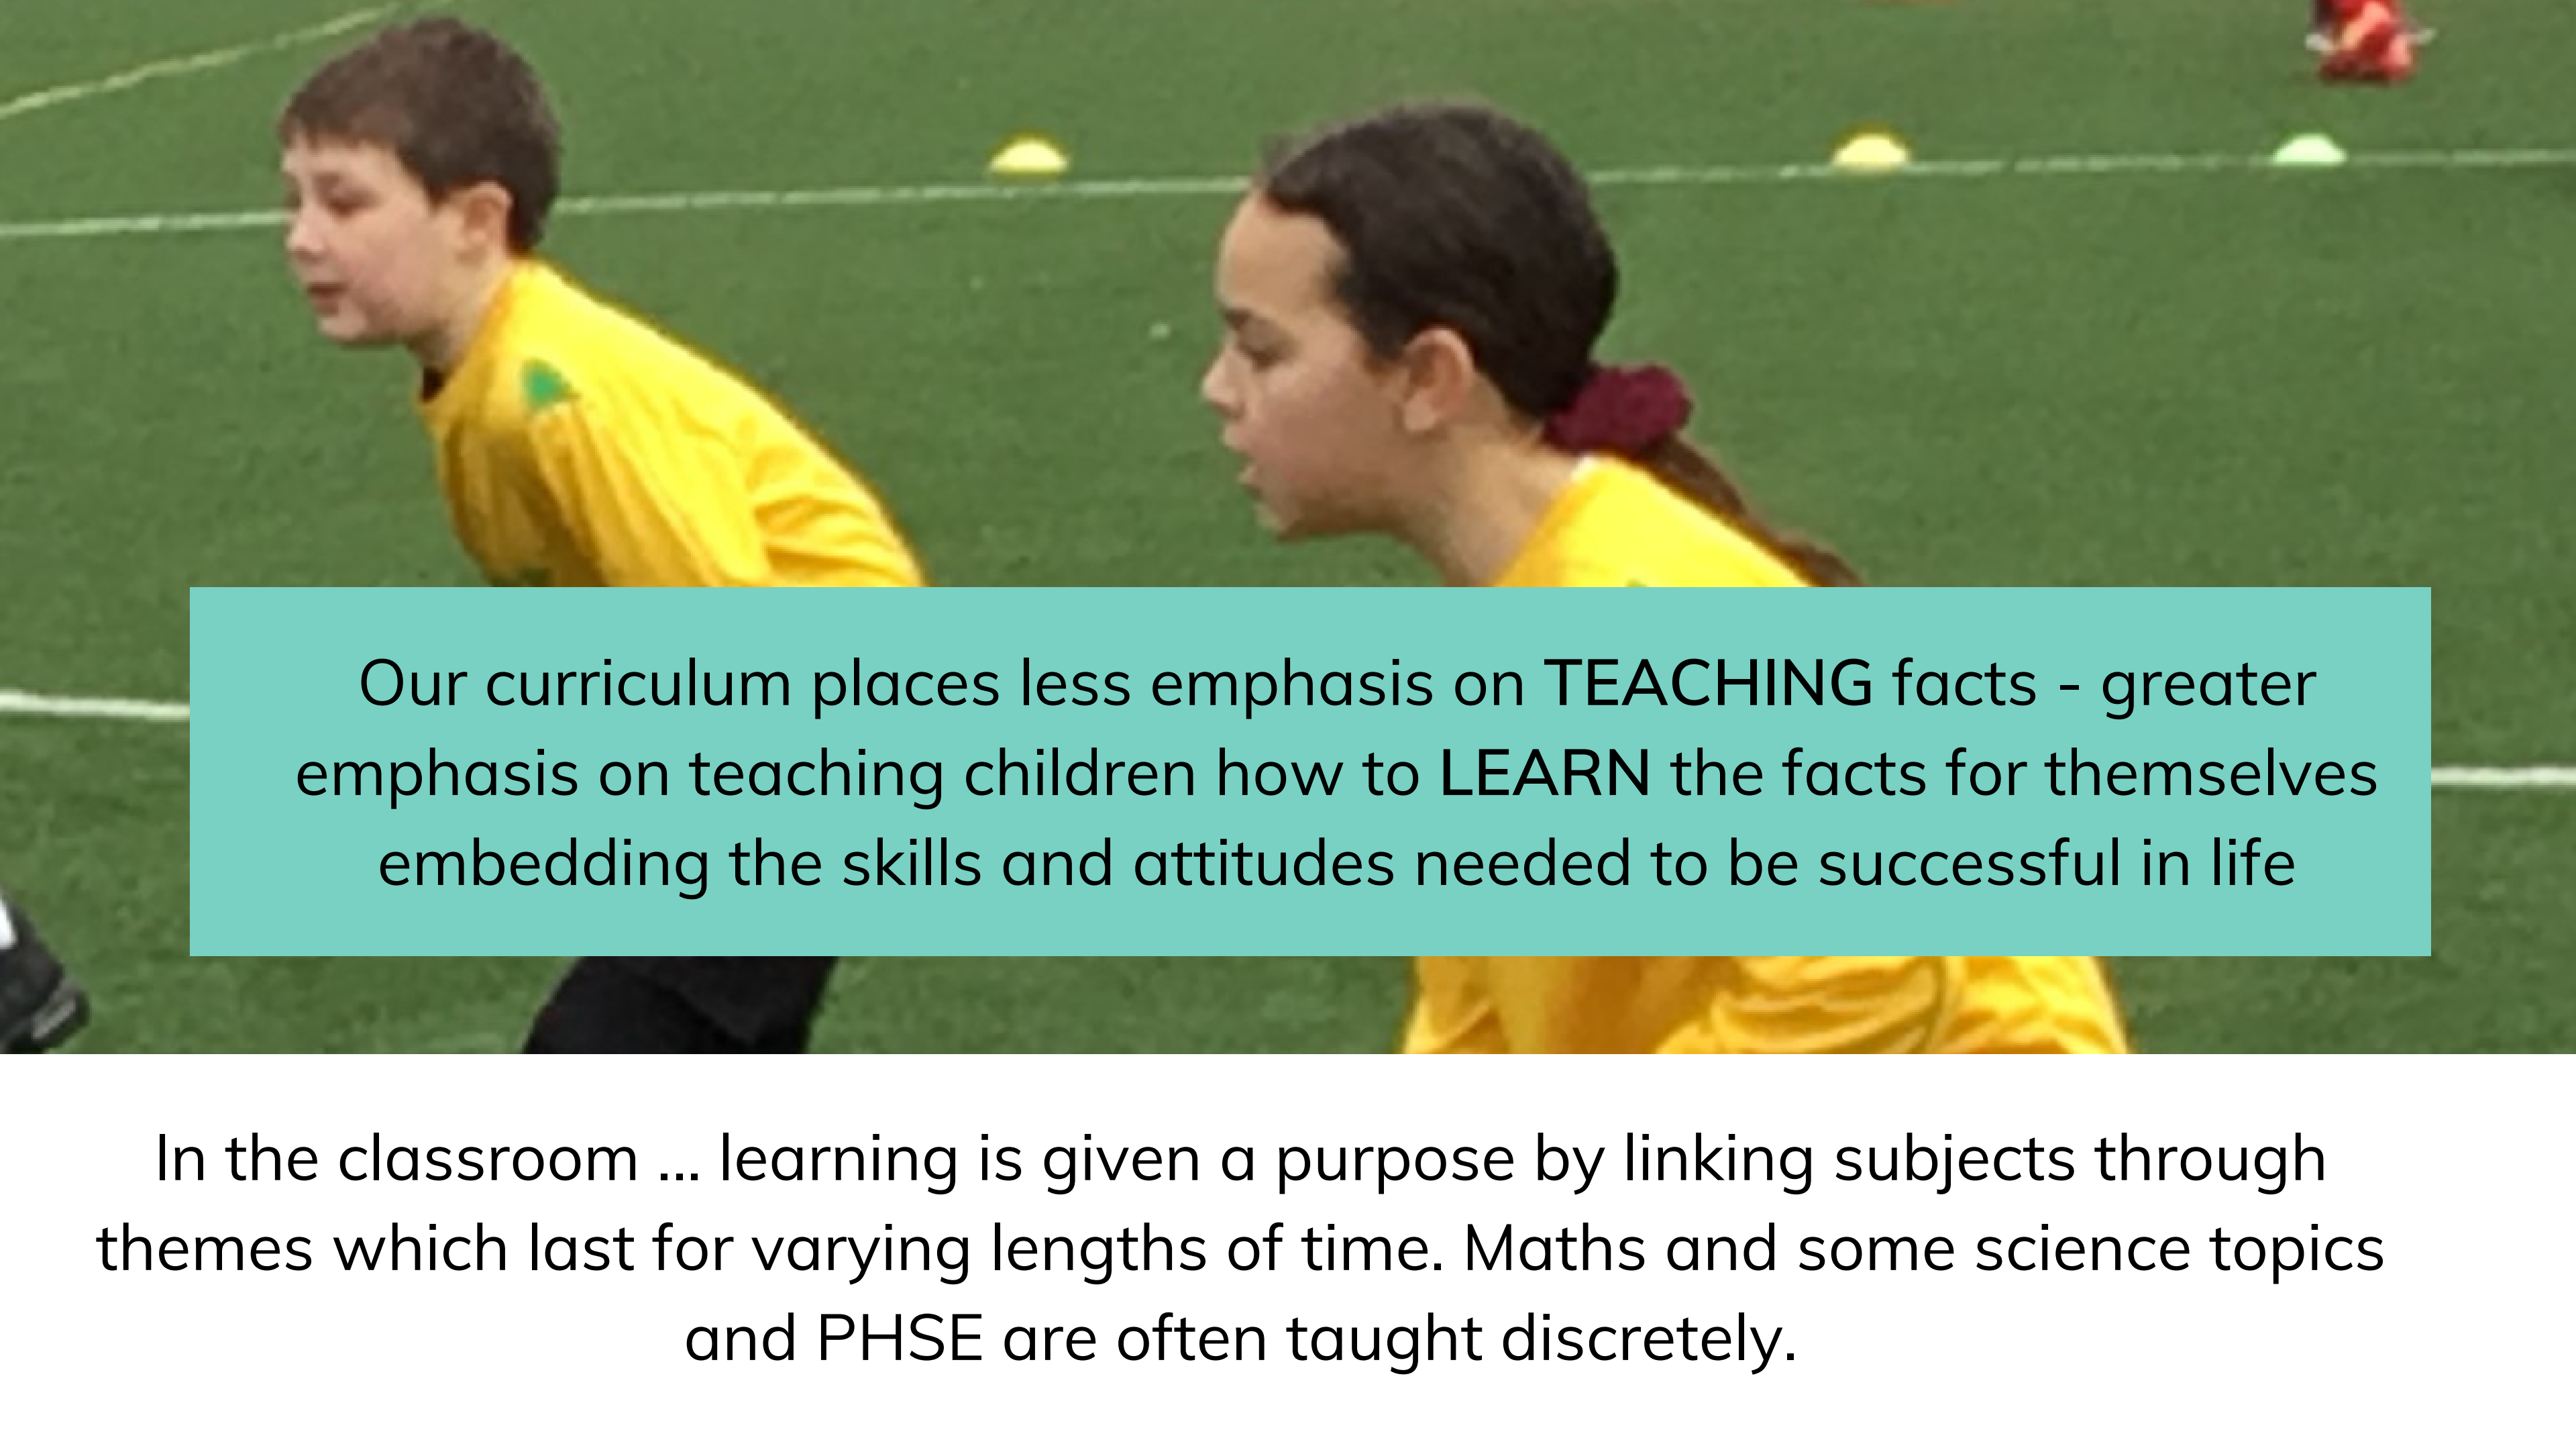

Our Values

aspire...enjoy...achieve

Our Vision

- responsible, independent individuals who have the knowledge and attitudes to contribute to and be successful in an ever-changing world
- creative imaginative thinkers and risk takers who enjoy challenge and love solving problems
- respectful and resilient learners

A photograph of two children, a boy and a girl, wearing yellow shirts and running on a green field. The boy is on the left, and the girl is on the right. They are both looking down and to the left. In the background, there are yellow cones and a red cone on the grass.

Our curriculum places less emphasis on **TEACHING** facts - greater emphasis on teaching children how to **LEARN** the facts for themselves embedding the skills and attitudes needed to be successful in life

In the classroom ... learning is given a purpose by linking subjects through themes which last for varying lengths of time. Maths and some science topics and PHSE are often taught discretely.
