## Living Things and Their Habitats

Key Vocabulary		
life processes	These are the things that all <b>living</b> things do. They move, breathe, sense, grow, make babies, get rid of waste and get their energy from food.	
living	Things that are <b>living</b> have all the <mark>life</mark>	
	processes.	
dead	Things that are <b>dead</b> were once <b>living</b> . They did have all the <b>life processes</b> but don't now.	
never living	Things made out of metal, plastic or rock were <b>never living</b> . They never had the <b>life processes</b> .	
food chain	A food chain shows how each animal gets its food. Food chains are one of the ways that living things depend on each other to stay alive.	
food sources	This is the place a <b>living</b> thing's food comes from.	

## Key Knowledge

Food chains. The arrows mean 'is eaten by'.

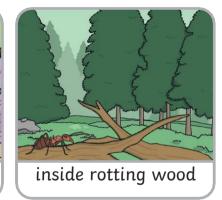

## Living Things and Their Habitats

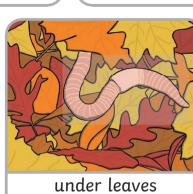

Key Vocabulary		Key Knowledge
habitat	A <b>habitat</b> is the natural place something lives. A <b>habitat</b> provides <b>living</b> things with everything they need to <b>survive</b> such as food, shelter and water.	Examples of habitats:
microhabitat	A <b>microhabitat</b> is a very small <b>habitat</b> in places like under a rock, under leaves or on a branch. Minibeasts live in <b>microhabitats</b> . The <b>microhabitats</b> have everything they need to <b>survive</b> .	woodland
depend	Many <b>living</b> things in a <b>habitat depend</b> on each other. This means they need each other for different things.	rainforest
survive	This means to stay alive.	ocean

## Examples of microhabitats:

flowers

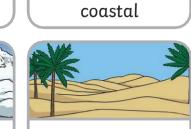

urban

arctic

river

the

desert
